

Sacred Landscapes And Alalakh As Hittite Cult Center: TELL ATCHANA EXCAVATIONS

Tell Atchana, (ancient Alalakh), is well suited to contribute to the topic of ritual landscapes. We are particularly interested in the introduction of new cults and their associated rituals in the international Late Bronze Age, when many foreign contacts and eventually foreign overlords such as the Hittites affected local society on many levels. This lecture will focus on newly excavated contexts and dating, sacred architecture, new seals, and burial practices.
